

Exercises

- Create a decorator for adding a sauce to Pizza instances:

```
@Sauce('pesto')  
class Pizza {}
```

In the above example, all instances of the Pizza class should have a **sauce** property set to **pesto**.

Solutions

- Create a decorator for adding a sauce to Pizza instances:

```
function Sauce(sauce: string) {  
  return (constructor: Function) => {  
    constructor.prototype.sauce = sauce;  
  };  
}
```
